

My name is Tyler Mayer, I am a 3rd year PhD student at Stony Brook University advised by Dr. Joseph Mitchell and Dr. Esther Arkin. My research interests are in Computational Geometry and Graph Algorithms. I would like to apply for financial support to attend CG week 2016.

I have submitted a talk to the SoCG YRF and hope to be a presenter at this event. I am very excited about meeting other young researchers and newly established professionals to spark new collaboration. Also, I am very excited about attending the SoCG workshops this year, in particular the “Geometric Computing on Uncertain Data” workshop as much of my research related to my thesis is on this subject.

I have no other sources of funding to attend this event, the entire expense would be out of pocket otherwise.

Thank you for your consideration.

Tyler Mayer
